

Best Under Pressure.

STRATE

The correct detailed solution with STRATE fittings.

■ STRATE is the professional partner for decision makers within the water and sewage industry. We are looking for long-term, clean solutions within ever tighter environmental guidelines for problems in cities, local communities, private property, and public land.

■ STRATE, with its all-encompassing know-how, develops modern technologies for water and sewage applications. Trust this proven technology which feeds your water and sewage just as you want, even on a large scale. As professionals with individual solutions for your specific problems – we are the right partner for you. You will soon realise: We can master the most challenging tasks – with first class technology of the highest quality and an all-round service. Try us.

STRATE Fittings

■ STRATE, with its 50 years experience in water and sewage technology, has developed for you a large range of fittings. Our fittings are specifically developed for sewage application, have a long life and are low-maintenance. Our non-return valves operate under low flow conditions and have a 100% free-flow passage. Look at our pressure relief valves which ease the start up of vane-type pumps. This saves you the use of sophisticated external control fittings. Reliable aeration and air-bleed valves, STRATE BEV's, prevent pressure build-up and lower energy costs. They are available in different standard sizes but can be manufactured to specific requirements. Our proven pipe ducts ensure tension free, gas- and watertight ducting of pipes. Or look at our low price WD - System. We are happy to develop special fittings for your sewage problems. Ask for our brochures!

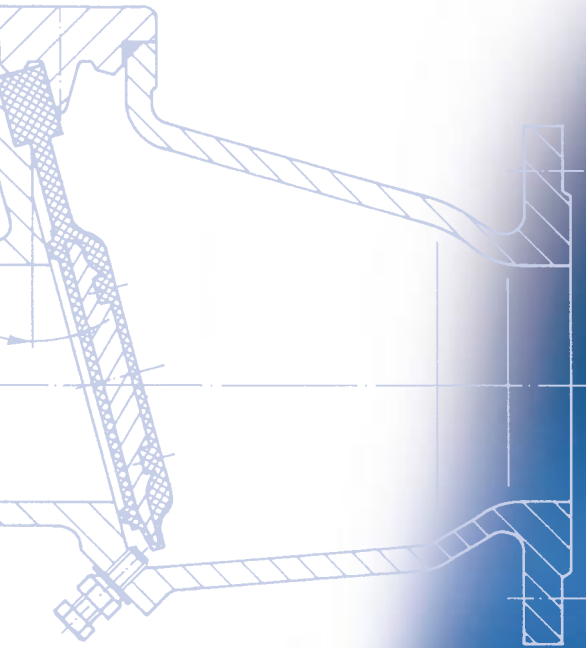

BEV

STRATES BEVs

Our medium controlled aeration and air-bleed valves for pressure pipe systems allow aeration and prevent pressure shocks. For a perfect and energy saving sewage system.

EVA-V
The low
valves

STR

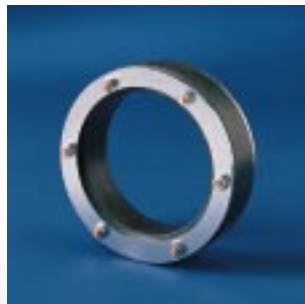

*Non-return valves of type RSK
Full range for every usage –
up to high tech version (-FTUD)
closing noise reduction and
pressure shock resistance.*

*AWASTOP –
The unique special non-return
valve for sewage.
100% opening for 100%
free passage.*

AWASTOP

*alves
w cost start-up relief
for vane-type pumps.*

*STRATE WD-System.
Seals tight – wherever costs
must be kept low – also
available in "square" format.*
